

Think loud .. Go **cloud**

Who Are Cloud4Rain?

Cloud4Rain was founded in 2016 between a group of young entrepreneurs from different information technology backgrounds, including digital transformation, cloud computing, cyber security and enterprise software. Their combined expertise gave rise to the company's diverse portfolio of services and products, and their keenness on keeping the teams constantly updated with the latest IT services and solutions truly sets the company apart.

Mission

Ours is a simple yet daring goal; to help our clients thrive in their respective fields by delivering the latest technology solutions that increase their revenues and cut their costs.

Why Cloud4Rain?

At **Cloud4Rain**, we value principles of quality, integrity and continuity, which is why we succeeded in becoming an IBM Golden Partner as early as the company's startup. As a group of IT professionals with a strategic vision and the expertise needed to be flexible in this versatile and ever-changing industry, the company always complies with **ITIL standards**. The tailored solutions we provide are proposed for business sustainability, and always answer to the particular needs and industries of our clients

What We Do ?

As a professional IT services and solutions provider, **Cloud4Rain** collaborates with clients to reach their business goals. We focus on proficiently filling the gaps in their digital infrastructures in such a way that optimizes their resources, their access to information and their business processes. Every solution is tailored according to business requirements and in the most cost-efficient way possible.

Cloud Solutions

Cloud4Rain solutions are diverse, and always in line with best practices and standards. Our team recommend the cloud adoption models that best suit our clients' business needs, making sure they correspond with the security, scalability and performance expected.

Public Cloud

Cloud4Rain is partnered with the world's most trusted and respected third-party cloud providers, including IBM, Microsoft Azure and AWS, hence offering you flexible, versatile and revenue-generating solutions.

Private Cloud

Through **Cloud4Rain's** trusted partners, the private cloud's resources are at your disposal, along with added privacy, flexibility and scalability.

Hybrid Cloud

Our **Cloud4Rain** experts are here to help you choose the best hybrid cloud solution for your business, incorporating the scaling, data access and privacy levels you need.

IT Services

As a professional IT services and solutions provider, **Cloud4Rain** collaborates with clients to reach their business goals. We focus on proficiently filling the gaps in their digital infrastructures in such a way that optimizes their resources, their access to information and their business processes. Every solution is tailored according to business requirements and in the most cost-efficient way possible.

Managed Services

Cloud4Rain Managed IT Services offers IT Advisory and Leadership Services to organizations In Egypt, Saudi Arabia, and many other country in the region.

We offer value-driven solutions above and beyond managing and operating hosting, security and a full range of IT support services. Our IT Advisory approach enables us to provide leadership to our clients in a complex rapidly changing IT environment.

Our focus is to provide maximum “business value” to our clients enabling them to grow their businesses, manage their risk/compliance, and increase their competitive position by delivering improved business results.

Our client-first approach means our solutions are based on what technology solutions are needed to “fuel” their business, not a particular hardware or hosting solution.

Software Development

As a professional IT services and solutions provider, **Cloud4Rain** collaborates with clients to reach their business goals. We focus on proficiently filling the gaps in their digital infrastructures in such a way that optimizes their resources, their access to information and their business processes.

Every solution is tailored according to business requirements and in the most cost-efficient way possible.

Websites

Cloud4Rain website developers deliver compliant, responsiveness and clean code using today's latest technological tools and principles.

Web Applications

Cloud4Rain experts develop tailored web applications that enrich the business capabilities of our clients and readily meet business challenges.

Mobile Applications

Cloud4Rain brings together only the best iOS, Android, and web app developers so you can outsource your project and get a top-quality product. We're 100% concentrated on your project while being capable of quickly and easily scaling your dedicated team.

Digital Marketing

Balancing between creativity, best practices and expertise, our marketing team tailors solutions that serve the business objectives and goals of our clients. By utilizing the latest KPIs and analytics tools, **Cloud4Rain** also measures the success of marketing plans and assesses their reach and impact.

We offer comprehensive digital marketing solutions that include branding, email marketing, social media management and SEO, to name a few. The digital strategies we put together revolve around lead generation, high customer conversion and optimized use of resources.

Security Enabling Your Business Goals

With the growth in cyber attacks and data breaches costing business and the public sector millions every year, cybersecurity is now high on the strategic agenda. Business leaders in both strategic and operational roles must answer vital questions:

- How do you know if your business is resilient enough?
- Are you compliant with privacy and security regulations and corporate policy?
- Is it possible to combine digital transformation with acceptable risks?
- How secure are your website, apps, data centers and data?
- How to transform your current practices to manage increasing threats?

By putting in place proper cybersecurity assessments and audits, your organization can define the right strategy and transformation program to protect your sensitive data and assets.

Cyber security consulting strategy and advice from **Cloud4Rain** Consulting can unlock a strategy that can be embraced across an entire organization from the boardroom to the reception area.

Increasingly, information security is not just an internal concern external stakeholders ask for assurance that organizations conduct business securely, and treat sensitive data appropriately. When implemented correctly, security can enable a business and strengthen its brand, organizations gain trust and credibility by protecting infrastructure and information to the highest standards.

Cloud4Rain Consulting offers a range of information security consulting services, such as helping to design a high-level security strategy or responding to specific cybersecurity incidents.

We provide consulting to customers on:

Cybersecurity Policies

Our Clients

Case Studies

Cloud4Rain is on a mission to enable businesses to lead in their respective markets. We bring this mission to life with a diligent process that begins with fully understanding their needs, and devising tailored solutions that focus on their business goals. Our professional teams, together with our partners and vendors, ensure every enterprise is equipped with the cloud, digital and information technology solutions they need to thrive.

Explore some of the diverse solutions and success stories **Cloud4Rain** has developed for clients.

Challenge: Obsolete infrastructure and low service availability.

Cloud4Rain resolved Amer Group's challenge by migrating the company's data to the IBM Cloud. Through the process, Amer Group underwent an extensive revamp and successfully restored service availability to 100%.

Today, the company boasts level high server availability and utilizes a comprehensive disaster recovery solution of critical services. Amer Group's IT team can now deliver a wide array of reliable services with no interruption.

Client:

Challenge: IT operations and support,
& technical documentation.

Cloud4Rain provided JOSLOC with onsite skilled personnel to support the company's IT operations. The team worked round the clock between Cairo and Riyadh to manage and review operations and systems, and make the necessary assessments and documentation.

By Implementing ITIL best practice, reporting and insights are now in place for management and strategists to move forward while adding value to JOSLOC employees.

Cloud4Rain went even further by helping JOSLOC with its cloud transformation, utilizing Office365 solutions for employees, and migrating critical systems to Microsoft Azure.

Client:

Challenge: Safety incident that caused server failure.

Cloud4Rain devised an effective solution for AHK that helped the company restore services and operations after a safety incident in the server room.

By migrating their systems to IBM Cloud and utilizing enhancements on mail security and system backup, AHK now runs a fully functioning data center on IBM Cloud.

The company hosts mail services, a files server and an active directory with an extensive backup policy and a secure uninterrupted connection to HQ.
